

# SELF-PACED LABS

(Secure cloud-hosting of labs anytime, anywhere)

## SOLUTION BENEFITS

### Remote Access

Provide access to training remotely and conveniently without traveling to a physical location.

### Scheduled Delivery

Launch labs in "Hot Labs" mode for scheduled delivery times.

### User Engagement Analytics

Track user access time, access duration, and rating and feedback for each lab session to better understand engagement.

### Full Control

Enable dynamically generated labs for complete control over custom content and time duration.

### Rapid Updates

Update the labs rapidly and provide revised content to students in a short period of time.

### System Flexibility

Make labs available for various software environments such as Windows and Linux.

## BUSINESS RESULTS

### Reduce Support Staff Costs

Eliminate the need for paid classroom instructors and customer support for installation issues.

### Eliminate Setup Time

Save time setting up and taking down classroom sessions at numerous physical locations.

### Streamline File Distribution

Save money and time mailing out executable files to a large number of recipients.

### Gain Competitive Advantage

Earn a competitive edge in training and create an additional revenue stream that can grow exponentially.
